PROFESSIONAL SUMMARY

Computer Engineering student and aspiring Full-Stack Developer with hands-on experience building web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in developing responsive user interfaces, integrating REST APIs, implementing CRUD operations and authentication, and deploying web applications. Interested in clean code, maintainable software, problem-solving, and AI-assisted development. Eager to contribute to a collaborative engineering team while continuously learning modern development practices.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Responsive Web Design

Backend: Node.js, Express.js, REST API Integration, CRUD Operations, JWT Authentication, bcrypt

Database: MongoDB, MongoDB Atlas, Database Design Fundamentals

Tools & Deployment: Git, GitHub, VS Code, Vercel, Render

AI & Machine Learning: Familiarity with Hugging Face pretrained models and AI-powered application development

Currently Learning: Firebase, Cloud Firestore, Firebase Authentication, LLM API Integration, AI-Assisted Coding Tools

PROJECTS

1. Bazar Dor — Daily Market Price Website

Technologies: Next.js, React.js, Tailwind CSS, JavaScript, REST APIs

- Developed a Bangla-language website for displaying daily prices of essential commodities in Bangladesh.
- Integrated REST APIs to retrieve product and category information.
- Implemented category-based product browsing and price comparisons across different time periods.
- Displayed price-change indicators to help users understand market price movements.
- Built a responsive interface to improve accessibility across desktop and mobile devices.

2. FitLog — Workout Library

Technologies: Next.js, React.js, Tailwind CSS, API Routes

- Developed a responsive workout-library website with a modern user interface.
- Implemented API routes for application data management.
- Deployed the application using Vercel.
- Focused on responsive layouts, organized components, and a user-friendly browsing experience.

Live Demo: https://fit-log-omega-two.vercel.app
GitHub: https://github.com/ayon6237/Fit-Log

3. MERN Expense Tracker

Technologies: React.js, Node.js, Express.js, MongoDB, JWT, bcrypt

- Developed an expense-tracking application with user registration and login functionality.
- Implemented backend API routes for expense management and expense history.
- Used MongoDB to store application data and support CRUD operations.
- Implemented password hashing and token-based authentication.
- Connected frontend components with backend APIs to support user-specific expense management.

4. Emotion Detection Web Application

Technologies: React.js, FastAPI, Express.js, Hugging Face

- Worked on an AI-powered application for identifying emotions from text.
- Integrated a pretrained emotion-classification model into the application workflow.
- Connected frontend and backend components to process text and display prediction results.

EDUCATION

Bachelor's Degree in Computer Engineering
Northern University of Business and Technology , Khulna (NUBTK)

Current CGPA: 3.655/4.00
Expected Graduation: December, 2026

CORE STRENGTHS

- Problem-solving and debugging
- REST API integration
- Learning new technologies independently
- Writing organized and maintainable code
- Building responsive web applications
- Working with AI-assisted development tools

LANGUAGES

- Bengali: Native
- English: Upper-Intermediate

ADDITIONAL INFORMATION

- Interested in full-time remote software development opportunities.
